Title:

Comments: Let this be a warning from Mother Gaia: Should anyone disturb these sacred lands for the sake of material wealth and power, not only will operations cease to align in any efficient manner but lives will be taken one by one until the mine is shut down and the area is properly restored.

Do not do this. It's not a threat, it's a warning. If you have any respect for God or a being greater than yourself, recognize now that you are firmly being told "NO".

Don't shoot the messenger. Gaia is on some "FAFO" energy. I am hearing "ENOUGH". I pray the right decisions are made with appropriate respect for the ancestors of this land and to avoid any further chaos.

With great power comes great responsibility, wield it accordingly.

Cheers! Xoxo
