Comments: I am commenting today to demand a comment period extension on Lien & Sons' drilling project at Pe' Šla. This project is shameful and wrong in the first place. The Forest Service should apologize to all tribes and the public for even considering it. You are violating treaties, including the 1851 Fort Laramie Treaty, you've failed to conduct any tribal consultations, and your website has been telling people to call an incorrect number for more information. The People never got a fair comment period. This is unacceptable! Extend the comment period now, and terminate this project.
