Comments: The Black Hills are sacred to the Lakota people. It is terrible enough that the treaty has not been upheld but to add insult to injury, a company wants to drill on the sacred land for potential monetary gain. I have no doubt that most people in this area are unaware this is even happening and if more people knew they would absolutely stand against drilling in the Black Hills. We have to stop the continued exploitation of this land. Please do not allow this company to drill in the Black Hills.
