Title:

Comments: I don't agree with the start of a mining operation so close to my friends family's cabin. It's extremely dangerous. I hate that people in positions to make these kinds of decisions don't think about the consequences their actions could have not only to wild life but to others as well. I think it's outrageous that someone decided to want this project so close to people's property. I oppose this and wish to stop it or help stop it.
