Title:

Comments: Thousands, if not millions, of people stand against this project. It is shameful. Proper consultation and consent have not been provided and this is a continuation of the centuries long genocide against Indigenous Americans, especially the Lakota. The youth have spoken out against this and sent in hand written letters begging you to not desecrate the land. The elders have led the movement against this. Even people from other countries are aware and paying attention to the actions you are taking. Protect the lands and waters, do not allow this project to go through. Allow for enough time for meaningful input from community members.
