Comments: I am a United States citizen who is writing regarding Rochford Mineral Exploratory Drilling Project #67838. I am opposed to this project because I am concerned about its potential negative environmental impacts as well as potential impact on an area that is sacred to the Lakota people. The Forest Service must require an Environmental Impact Statement (EIS) for this project to fully gauge the potential environmental impact and take into consideration the impact that this project would have on nearby sites that are sacred to Indigenous people. If potential negative environmental or cultural impacts are found, I believe that this project should be rejected.
