Comments: Greetings with humble prayers. On Behalf Tasunke Witko Crazy Horse do not proceed with this gold mining. In Lakota way of life this is the last resort last frontier therefore what you destroy will have conquered the most important thing on this earth the relationship of human kind. Then it will add another impact the Water all the runoff will reach rapid city water intake then all it will be used for is toilet. I am tired of fighting with you but please let it be said the beautiful black hills will disappear and the long residence and we as Lakota people will not have that in 15-20 year's. The South Dakota people been here before rush to move here by others will make a Newark New York east coast look then it will be to late. Money is the root of life but when you can't fish trail walks bike rides running cause your worried bout the new people and this gold hunters and lead to dangerous home environment and children grandchildren only then you will pray but be late. We been through it longtime we survived but you might not. Like a fish out of water gasping what did we do. Sad deal.
