Comments: I am demanding a comment period extension on Lien & Sons' drilling project at Pe' Sla, a sacred site to many Tribal Nations. This project is shameful and wrong in the first place. The Forest Service should apologize to all Tribal Nations, and general public for even considering this. You are violating treaties, you've done no tribal consultation, and your website has been telling people to call an incorrect number for more information. This is unacceptable! Extend the comment period and honor the treaties.
