Title:

Comments: As a Native American, our lands are sacred & needed for our future generations. Drilling & mineral extraction only helps generate wealth for a small group & leaves the rest of us to suffer the consequences of the damages done to Mother Earth. In 2025, it shouldn't even be a question - damaging the earth is NOT an option. Global warming is the major concern yet this proposal encourages further damaging our earth? This is a horrible proposal & I object any drilling or mineral extraction from our earth. We need to be SAVING our planet, not destroying to further to help a few people get rich. Strongly object.

"Only when the last tree has died, and the last river been poisoned, and the last fish been caught, will we realize we cannot eat money"
