Title:

Comments: As a Native American, I am against drilling and the continued extraction of minerals. These are detrimental to the lands and environment, and also devastating our wildlife, plants, ecosystem and future generations. Irresponsible and selfish decisions have caused climate change. U?cí mak?á (Mother Earth) and her lands are sacred. We need smart, well thought out decisions to help save our Earth ?? . Selfish decisions made for political favors, or to help a small few to line their greedy pockets more is unfathomable.

I STRONGLY OBJECT to drilling and extraction of minerals. Help save U?cí mak?á
