Title:

Comments: Canada has signed UNDRIP which requires free, prior, and informed consent from the stewards of the land. Canada and the companies that work within its framework are called upon to uphold the original treaties between settler-colonists and the nations that existed here - namely to care for the land and not to interfere with the lifeways of the existing nations.

It is clear that this project does not meet the standard for either of these responsibilities; the children of this nation object and the mining project would interfere with sacred sites and therefore the lifeways of the community.

Stop this project. We are watching.

- A descendant of settlers
