First name: Elinor

Last name: Frothingham

Organization: Gold 2 Green

Title: Operations

Comments: Mining should not occur in ecologically sensitive areas or historically significant areas--both of which this region is-- regardless of what any environmental impact survey or (both) political parties tell you. The human species must learn to do with less, instead of indulging ourselves and ruining everything around us. We are not apes that build a new nest every night because they've fouled the old one. Or are we?
