Comments: I am against the expansion as requested and would be appalled if the USFS approved expansion outside Grand Targhee's present footprint. It would violate the Wilderness Act of 1967 which they are bound to protect and uphold. Expansion into the Mono Trees down into Millcreek and the South Bowl into Teton Canyon would destroy the Gem and treasure of our county for the profit of the Gillette family, while screwing the public out of the land they love. In order to approve this the USFS would need to rezone those areas from their present stated purpose so one would need to ask why? They are a stated no motorized zone and fragile winter habitat so how could you now change your mind and allow ski lifts, diesel groomers, snowmobiles and the chaos of a ski resort ??? Please do nothing more than OPTION 3, minus many the absurd asks within bounds.
