Comments: I care about protecting the Black Hills from economic exploitation. I oppose Rochford Mineral Exploratory Drilling Project #67838. The mining will hurt and poison the lands and waters of many areas in the Black Hills that must be protected at all costs. Pe' Sla is a sacred space and land with much importance for the traditional ceremonies of the Lakota people. The rights of native peoples land must be respected. There must be an extension of at least 60 days for the public comment period to allow as many people as possible to participate. The Forest Service must require a full Environmental Impact Statement.
