Comments: I'm writing in opposition of this project and in order to stand in support of protecting Pe' Sla. I'm concerned and troubled by the lack of consultation of indigenous peoples local to the area, and to for the disregard of upholding treaty rights. Especially at a time when we can't seem to adapt quickly enough to a rapidly changing climate- we should be seeing more value in protecting our lands, water and air- and those who steward (and have always stewarded it) these lands over giving in to more mining and exploration projects like the one proposed here. Thank you.
