Title:

Comments: This is the time and day that we should be asking ourselves how much more can we take from the Mother our Mother Earth. We need to stop this and respect the land for the holy site. Among the people of this land. I stand with my relatives most importantly I pray with them. We won't stop praying and standing for our mother.

I ask that you please understand the importance of the natural elements. Some things we don't brother for the their life. Image if someone came into your home and took and left nothing for you. I pray that you all educate yourself with the sacred truth of the land and the people here.
