Comments: I am demanding a comment period extension on Lien & Sons' drilling project at Pe' Šla. This project is disgraceful and wrong . The Forest Service should apologize to all tribes and the public for even considering it. You are violating treaties, including the 1851 Fort Laramie Treaty which was signed by my own grandfathers, you've failed to conduct any tribal consultations, and your website has been telling people to call an incorrect number for more information. Regular people lose their job for a fumble like that. The People never got a fair comment period. This is unacceptable! Extend the comment period now, and terminate this project.
