Comments: I have no objection to expanded services within the current Grand Targhee footprint. I am 100% opposed to any more boundary expansion into public lands. I live in Teton Valley full time. I ski at Targhee. The number of user days is not sufficient to grant a large scale expansion. I fear Targhee will become a resort for rich second home owners and affluent skiers. Grand Targhee has already designated a private area for Tributary. Is this the canary in the coal mine? It becomes a private or semi private resort in the future. If any more public land is given to the resort it must be guaranteed that this resort cannot become a private or semi private ski area. I fear that the expansion is to feed the real estate developers hunger for more condos. The forest service should not be in the real estate business but should protect the wildlife and the public lands.
