I plea for no further expansion of Grand Targhee resort. Ski area resort attendance in US is falling due to predatory pricing by the resorts and the entire ski industry. Thus, there is no need to destroy pristine wilderness that can never be recovered in the future. The wilderness soil, fauna and flora should be kept for future generations. Nobody but wealthy business interests are benefitted from such a transgression. Skiers like myself have a great mountain is it is and its expansion can't be argued to benefit this class of the population.

The decision should be "no" to expansion.

Thanks, Skier at Grand Targhee since it opened.
