Comments: I vote for Alternate 1. No development.

GT is great just the way it is, we don't need more.

Targhee has not shown an adequate need to privatize more public lands. The costs of an expansion would be born by wildlife and the neighboring community. Expansion is crazy and totally unwarranted.

Boundary expansion will eliminate secure habitat for grizzly bears, resulting in increased human-grizzly conflict and increased probability of grizzly removal (death).

Bighorn Sheep, a small vulnerable, population would: lose 54 acres of high quality winter habitat essential for survival-lose access to the Apostle mineral lick, an important resource.

The idea of building a mountain top restaurant/lodge is insanity. We run the risk of ruining one of the greatest view sheds on earth. Privatizing your wild lands is a mistake and will ruin the ecosystem for future generations.
