Comments: Good Evening,

Please keep enough good blood lines of the Pryor Horse Herd so they can be genetically viable for decades to come. I realize that some horses should be removed due to inbreeding but please keep the ones with strong blood lines. The Pryor horses are so special, my fear is that the future will hold no hope for our wild herds which would be a shame. So many wild things are disappearing from our wild places, please don't let these wild horses disappear too.

Please do everything you can to save them.
