Comments: Thank you. I am opposed to several areas of the expansion and support areas of the expansion. The following items are simply bad planning and bad decisions on anyone's part: on mountain restaurant, expansion into Mono Trees, expansion into south bowl. Climate change is real and allowing destruction of natural habitat for ski terrain that will be useable 1 time every 5 years is worse than stupid. Grand Targhee needs to focus food services in the base area, clean the existing bathrooms, make the existing areas more efficient first and then expand on the private property in the base area like every other business in America, they are not entitled to use public land. If they want to build a chairlift in crazy horse, go for it, the tourists will love not having to go to the summit. The chairlift in ricks basin is not the best idea, but give it a try and see if it actually gets used that often. Not everything needs to be bigger to be better - it simply needs more thoughtful planning, which is a unknown concept to some businesses. Targhee is awesome at bike trails - bring that philosophy to the skier services - and above all, start cleaning the bathrooms!!
