Title:

Comments: Since Grand Targhee Resort is in Teton County, Wyoming, the tax benefits of expansion will go to that County. However, the access and local infrastructure associated with expansion would be a burden for Teton County, Idaho. There are already problems with infrastructure such as affordable housing, road maintenance, and schools. Also, traffic is already a problem on Ski Hill Rd. These would only be increased following a major expansion of GTR. There is no benefit to Teton County, Idaho. Only increased costs and out of control development.
