First name: Andrew

Last name: Salter

Organization:

Title:

Comments: oWildlife: The expansion would destroy habitat for grizzlies, lynx, wolverines, bighorn sheep, and nesting raptors.

oWilderness & Recreation: It would bring lifts, noise, and infrastructure to the edge of the Jedediah Smith Wilderness, compromising solitude and human-powered recreation.

oCommunity: The base area buildout would quadruple commercial space and double visitor capacity, straining housing, roads, and emergency services. A 2022 study concluded local Idaho governments would see "only costs" from this development.
