Comments: I am a resident of Teton County for 2 years now. I am extremely horrified by the prospect of an expansion of Grand Targhee resort into or near Teton Canyon. I encounter wildlife there every time I hike in the canyon. This development will disrupt the wild populations there to an immeasurable degree.

This is public land, and those of us who respect nature and its animal communities believe it is unconscionable to even consider expanding the resort in this direction.

In addition, Targhee has a wonderful spread of lifts all along the bottom of the hills and never seems to have a substantial back up in the lift lines. Therefore, this development is totally unnecessary, destructive and only serves to line the pockets of developers. Protect our wildlife and wildlands!
