Title:

Comments: My comment(s) are that any proposals/alternatives for management of GTarghee take into account protection of wolverine habitat, whitebark pine occurrence, and rare (Arctic) flora that are known to exist and would be detrimentally affected by any expansion. The resort currently offers all that it needs to within the existing boundaries; it need not expand into a carnival like setting, especially no restaurant on the summit is needed. If more restaurants and services are desirable, they should be provided for or located in Victor, Driggs, Teton business district(s), where natural habitat is not directly impacted. Keep the Ski Hill as it is, keep it Grand. No expansion. --Earle Layser
