Title:

Comments: I am opposed to further private development on undeveloped public lands. The impacts of the proposed Targhee expansion to wildlife, noise, wilderness, and pristine public lands cannot be turned back. The important white bark pines will not regrow. Habitat will be forever lost.

Keep Targhee development inbounds. I only support Alternative 3 if there are no backcountry gates on the north boundary, if the Fred's Mountain Top guest facility is removed, and if any development requiring Forest Plan amendments is excluded.

Don't lose this moment to protect this critical public resource.

thank you-

John Curtis
