Comments: I am a user of forest service land and all public lands and I am against the Grand Targhee expansion. At some point we have to stop abusing the land. Why does one user group get preferential treatment over others? Why does a company get to make drastic, permanent changes to the landscape and make a profit? The land that is all of ours. It's the citizens land, not land just for skiers and snowboarders. There are 2 other resorts within an hour from Grand Targhee, we have enough destroyed mountains and clogged roads, not to mention communities that locals cannot afford to live in because of the amount of people that have vacation homes they occupy a very small percentage of the year. I was born and raised in Wyoming and it is sick to see the abuse from those who don't care for the land and just use it as their vacation spot without adding to the communities in Wyoming.
