Comments: Simply put, no development in any part of the Teton Canyon drainage should ever be allowed.

If one were to pick the "Crown Jewel" of Teton Valley Idaho, even though it's technically in Wyoming, it would be Teton Canyon.

We must not degrade our most sacred space. Teton Canyon is in Wilderness, so how can it even be considered?

Absolutely, there should be no further encroachment on the people seeking peace, quiet, and beauty in the Shangri-La of Teton Canyon.

There should be no further encroachment on the wildlife of Teton Canyon.

We must stop the spread of human machinery into our sacred places!
