Comments: Please do not expand beyond the current borders of the Targhee Ski resort, but rather contain new development to within the resort's existing area. I am very concerned about the impacts to the Whitebark pines as well as to the surrounding backcountry and natural habitats. It is so important we preserve the planet's remaining wild places. There is so much pressure to develop in so many places; and while there may be desire to expand Targhee beyond its current boundaries, it is not necessary. Thank you very much for the opportunity to comment and for your consideration of this very important matter,
