Title:

Comments: I object! Please select Alternative 1, No Action.

E-bikes have no place on the Phil's Trail network. It's crowded enough now, dangerous enough now, destructive enough now to native flora and fauna without adding untold numbers of beginners and novices, bike renters, riders who haven't had or haven't taken the time learn trail etiquette, uphill/downhill rights-of-way, single-track preservation - Alternative 2 is an invitation for overuse, trail and forest degradation unseen heretofore. Not to mention the accident and injury and rescue operations that will surely multiply.

Just because the technology is there doesn't mean the technology should be allowed in the Forest.
