Comments: As a member of the community and a supporter of responsible recreation access, I am writing to support the proposed expansion of Grand Targhee Resort, provided that it is executed with careful consideration for environmental sustainability and local impact.

Nearly all major Mountain West resorts have been permitted to expand over the past two decades to accommodate growth, improve skier dispersal, and upgrade outdated facilities. Grand Targhee should be allowed the same opportunity.

That said, I support an expansion plan that rigorously addresses environmental concerns to ensure that this development contributes positively to the region's long-term vitality.
