Comments: Please do not expand Grand Targhee Ski Area. Grand Targhee's expansion in the last decade is extensive and underutilized. The current public forest lands surrounding Targhee should remain un-developed for wildlife species and humans. Creating a huge recreation area adjacent to the Jedediah Smith Wilderness would jeopardize Wilderness qualities and character. We only have a tiny % of Wilderness in the United States and I'm for adding more not infringing on these precious acres. With the current administration's threats on Public Lands, we must get all hands on deck to protect and not further develop public lands.

Thank you for considering my comments.
