Comments: Greetings,

Thank you for your work on this very important issue. I live in Teton Valley, Idaho, and I share the concerns of many about the proposed Grand Targhee expansion and its effects on Teton Valley, Idaho. No one has provided a convincing argument that the increased pressure on Teton Valley, Idaho can be dealt with, be it pressure on infrastructure of all types (traffic, emergency services, water supply and sewage, etc.); increased pressure on already very expensive housing, schools, and social services, and more--as all the comments you've received address far better than I can!

I completely oppose expansion to the South side--keep that wild! Solitude matters!

I completely oppose restaurants etc. that can be seen at the top of the mountains from either side! Don't allow that incredible view of the Tetons to be messed up!

The DEIS does not adequately address water quantity and quality issues and air quality issues.

These are some of the major concerns I have, and they leave me supporting the no-action alternative, or possibly a mild compromise with some expansion of ski area and services (NOT into the south bowl and Teton Canyon!).

Thank you for your work on this; thank you for looking after our forests. We are so lucky to have them.
