Comments: Ski areas are wonderful things. They bring the outdoors to so many people. The Greater Yellowstone Ecosystem is huge. Expanding the Grand Targhee ski resort won't hurt the natural environment in the slightest and will be greatly appreciated by thousands of skiers.

I'm all for allowing Grand Targhee ski resort to expand as much as they wish. I look forward to skiing the new terrain, and eating in their new restaurants. And I'll still go climbing and camping in the Tetons and the new expansion won't diminish that experience in the slightest.
