Comments: To Whom It May Concern,

I am writing to express my profound concern regarding the proposed expansion of Grand Targhee. Having just spent a day cycling, exploring the forest, and enjoying the wildflowers in the very areas slated for development, I can attest to the irreplaceable value of this special place.

The thought of this unique forest being stripped away is truly heartbreaking. The expansion is unnecessary and will irrevocably alter the landscape. Summer activities are just as vital to this area as winter sports, and further development will have a devastating impact.

Specifically, the north boundary contains some of my favorite aspen groves in the area, and I have frequently observed bears enjoying this habitat.

This place holds immense significance for many people, and I urge you to halt the expansion.

Sincerely,

Jamye Chrisman
