Comments: I am strongly against the proposed Targhee expansion at any level. There is nothing that it will not affect, from wildlife to scenery to privacy to agriculture to taxes. The expansion would significantly decrease the serenity of our valley. I am also concerned with the precedent that this will set for further expansions of Targhee if it is passed. If it is passed, I would not be surprised if, in a few years, another expansion is being proposed.

Targhee has already turned previously public land into private land, and, as history repeats itself, any public land allotted to Targhee will likely become private land eventually. For these and many other reasons, I do not want Targhee to expand.
