Comments: Mono trees and South bowl lifts are totally unreasonable, due to their impact on nature, the actual thing we came here for. The restaurants, well, if you think you can make them float, go for it. All of the buildings at Grand Targhee are in disrepair, though they have done an exceptional job for the amount of time and their usage these past decades. What about redoing base are buildings first and then see? Also, the town and county that literally everything goes through, Driggs, Teton Co, ID, gets full use but no remuneration while using its infrastructure, as well as a place for employee housing. It is extremely lopsided for Teton Co, WY, to receive the taxes collected with nothing going to Teton Co ID.
