Title:

Comments: I don't think there should be any drilling in Spearfish Canyon. We cannot risk contaminating the water of Spearfish Creek. It is our agreed that this brought us to the brink of extinction. We must cease and desist for many of the activities that we do these extraction practices have extracted life at every corner. Let's just slow down for a while. We must think about the next seven generations before any activity. The Lakota, whose homeland we are upon would say everything you need the mother will bring to you, don't need to dig up anything

I sure wish we asked the land how it wished they be used and anyone still had ears to listen for and hear the answer from nature .
