Title:

Comments: I am in favor of rebuilding this shelter. Violent storms roll in suddenly up on Mount Timpanogos, with freezing rain, hail, and snow, even in the middle of the summer. I have personally seen the former shelter protect hikers caught in these storms. Without this shelter, many hikers will be left exposed to these storms and it is likely that hikers will be injured or in some cases even die because they had no protection from these storms. Please rebuild the shelter to protect the lives of the many thousands of hikers who hike Mount Timpanogos every summer.
