Comments: I am writing to comment on the Uinta-Wasatch-Cache National Forest's proposal to reconstruct the Emerald Lake Shelter. I am fully supportive of Wilderness, Wildlife and Nature in any form that will benefit NATURE, NOT industries or corporations making blood money from our precious resources.

I could not tell from the description of the proposal whether it is beneficial or not. The proposal states that the reconstruction of the Shelter at Emerald Lake will help to better serve its wilderness character, recreational activities and educate the public. That may sound beneficial, but I am getting used to this country blowing smoke at proposals that will enrich big pockets. I believe the Wilderness should take care of itself without human interference. I am apposed to putting in more recreational activities for the public. Wilderness does not need recreational activities that will trash our wilderness. That land is for Nature and Wildlife.

I guess what I am saying is that IF this proposal truly benefits Wilderness I am for it.

BUT if it just means more buildings, more tree removal, paths for off-road vehicles, more fishing and hunting I am 100% opposed to the plan.

Our country is destroying itself for monetary goals. Please think of ethics and decent morality.
