Title:

Comments: I do not feel this project is a good use of funds and resources. To rebuild in an area that has already proved to be a bad area does not make sense. The forest already has a long list of deferred maintenance. By rebuilding this structure, we are just adding to that list in the future. I am in favor of cleaning up the facility and rehabbing the area. Let's focus this type of building on the front county sites, please.
