Title:

Comments: If completed, this abomination will create 43 drill pads, each with the potential to wreak havoc 24 hours a day in Spearfish Canyon, a peaceful creek side and scenic byway right in people's backyards, consequentially contaminating not only drinking water but also important ecosystem. Overall, this is sacred land to a sacred people who have been here for thousand's of year, it is ultimately disrespectful and greedy. Not only does it destroy the land, but the people who inhabit that area as well.
