Last name: Widdowson

Organization:

Title:

Comments: I state my objection to this operation. The whole of the Black Hills should remain pristine and undisturbed for the sake of all relatives- human, plant, animal, fungus, water, soil, air. I am especially concerned for the indigenous Americans to whom these lands are ancestral and sacred, and who have repeatedly suffered broken treaties and threats to the preservation of their culture as a result of industrial greed.

The more the earth tells us, all the more pressing is our obligation not to knowingly perpetuate suffering. As a species, we know better. Please create an accurate Environmental Impact Statement for this project.
