First name: Patricia

Last name: Kelly

Organization:

Title:

Comments: The structure proposed to be repaired has nothing to do with the wilderness. As such it should be left to slowly become part of the wilderness by being left alone and disintegrating back to the earth. Please follow the instruction defined in the Wilderness Act. Which is a law. Please, as stewards of these incredibly special last places on earth, not violate those instructions. Preserve the Wilderness. Do not invade and cause irreversible change by setting a precedent for more violation of Wildernesses in the future. Do the right thing. Wilderness areas are keys to the future survival of humans on this planet. But only if left intact. Thank for hearing what I have to say.

Patricia Kelly
