Comments: I strongly oppose the proposal to reconstruct this useless hut in the Mount Timpanogos Wilderness. The hut remnants should be allowed to deteriorate in time - or use wilderness-compatible means to remove the remnants (although the latter would be a waste of time and energy).

This hut detracts from the Wilderness and fails, as well, to meet the Wilderness Act requirement.

The Wilderness is no place for a project involving helicopters and other motorized equipment. An EIS is needed before any such project is done.
