Comments: Please do not disturb the wilderness rebuilding this damaged hut, which is not needed to maintain the nature and usage of this wilderness area.

The Forest Service wilderness policy recognizes that a structure is not needed for visitor use, stating that visitors must be prepared on their own to face "inherent risks of adverse weather conditions, isolation, physical hazards, and lack of rapid communications, and that search and rescue may not be as rapid as expected in an urban setting."

The Forest Service must analyze and adopt an alternative that lets the Mount Timpanogos Wilderness be wild by allowing the metal remnants of the Quonset hut to fade with time or by using wilderness-compatible means to remove it. The remaining rock and cement could be safely dismantled and allowed to fade back into the Wilderness. The claim that it can't be dismantled (or even repaired) using traditional means is false, as the Forest Service built the hut without motorized equipment.

If it is decided to proceed with rebuilding, an Environmental Impact Statement (EIS) is needed, especially because the Forest Service proposes a project in Wilderness involving helicopter flights, motorized equipment, jackhammers, cement mixers, and other motorized tools.

Please allow this structure to decompose naturally and return the area to wilderness.
