Comments: Regarding the Stone Creek Vegetation Management project, it is important to me and to all non-commercial USFS users that the USFS leave large trees and other biological legacies in the project area intact, protect sensitive wetlands and meadows from disturbance by heavy machinery, and include the Confederated Tribes of Warm Springs' recommendations for restoration of this once pristine area. Anything less is just that: leaving a mess made by short-sighted interests.

The USFS should also restore problematic dispersed camp sites in the area around Timothy Lake, and prevent unauthorized access to closed roads to protect wildlife and sensitive habitats.
