Title:

Comments: This project would impact ~3,225 acres in an area of the Clackamas River Ranger District south of Timothy Lake. Please make sure to include the groundtruthing and wetland survey data from Bark in your decisions about the design of this project. In addition, it is VERY IMPORTANT: that the Forest Service make certain to leave the large trees and other biological legacies in the project area INTACT; that the Forest Service protect sensitive wetlands and meadows from disturbance by heavy machinery; that the Forest Service include and support the recommendations of the Confederated Tribes of Warm Springs regarding this project; that the Forest Service restore problematic dispersed camp sites in the area around Timothy Lake; and that the Forest Service prevent unauthorized access to closed roads to protect wildlife and sensitive habitats. Thank you for this opportunity to comment and for your time and attention to my concerns.
