Title:

Comments: I am in favor of the expansion. My family has had season passes here for the 2 decades. In your study please consider a chat with the highway department that keeps 143 open to communities to the east like Panguitch, Duck Creek, Orderville, Glendale and Kanab. In any snow year other than less than average they close the gates and stop maintaining it until the system passes. A few days after a storm is understandable because of the harsh wind and drifting up there. Often though, a decent storm closes it for 2 weeks to a month adding an hour plus plus to the commute for these communities. If they decide to go at all, it increases traffic from Parowan up. It seems that some budget money ought to be allocated towards that to reduce the amount of closed time in the future. Especially during holiday periods. The other issue leaving it closed is having such a large population there for the resort and only one way in and out when it's closed. Thanks for the consideration.
